Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a method of supplying a spectrally ultra filtered wideband signal, classified in class 333, subclass 167.
 - II. Claims 9-25, drawn to an ultra wideband transmitter, classified in class 375, subclass 295.
 - III. Claims 26 and 27, drawn to the structure of a singly terminated filter, classified in class 333, subclass 203.

These inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because:

- the inventions have acquired a separate status in the art in view of their different classification.
- the inventions require a different field of search (see MPEP § 808.02),

Therefore, restriction for examination purposes as indicated is proper

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
